

Лабораторная работа 5

Задание 1

Создайте scalar-valued функцию, которая будет принимать в качестве входного параметра id заказа (Purchasing.PurchaseOrderHeader.PurchaseOrderID) и возвращать сумму по заказу из детализированного списка заказов (Purchasing.PurchaseOrderDetail.LineTotal).

```
CREATE FUNCTION [Purchasing].GetSumOfOrders(@PurchaseOrderID INT)
RETURNS MONEY
AS
BEGIN
    DECLARE @result MONEY
    SELECT @result = SUM([AdventureWorks2012].[Purchasing].
        [PurchaseOrderDetail].[LineTotal])
    FROM [AdventureWorks2012].[Purchasing].[PurchaseOrderDetail]
    WHERE [PurchaseOrderDetail].[PurchaseOrderID] = @PurchaseOrderID
    RETURN @result
END;
GO
```

```
PRINT [Purchasing].GetSumOfOrders(1);
```

```
AdventureWorks2012> PRINT [Purchasing].GetSumOfOrders(1)
[2020-11-12 23:15:02] [S0001] 201.04
[2020-11-12 23:15:02] completed in 5 ms
```

Задание 2

Создайте inline table-valued функцию, которая будет принимать в качестве входных параметров id заказчика (Sales.Customer.CustomerID) и количество строк, которые необходимо вывести.

Функция должна возвращать определенное количество самых прибыльных заказов (по TotalDue) из Sales.SalesOrderHeader для каждого заказчика.

```
CREATE FUNCTION [Sales].GetBestOrdersByCustomerID(@CustomerID INT, @CountOfRow INT)
RETURNS TABLE AS RETURN (
    SELECT TOP(@CountOfRow)
        [SalesOrderID],
        [RevisionNumber],
        [OrderDate],
        [DueDate],
        [ShipDate],
        [Status],
        [OnlineOrderFlag],
        [SalesOrderNumber],
        [PurchaseOrderNumber],
        [AccountNumber],
        [CustomerID],
        [SalesPersonID],
        [TerritoryID],
        [BillToAddressID],
        [ShipToAddressID],
        [ShipMethodID],
        [CreditCardID],
        [CreditCardApprovalCode],
        [CurrencyRateID],
        [SubTotal],
        [TaxAmt],
        [Freight],
        [TotalDue],
        [Comment],
        [rowguid],
        [ModifiedDate]
```

GO

Вызовите функцию для каждого заказчика, применив оператор CROSS APPLY. Вызовите функцию для каждого заказчика, применив оператор OUTER APPLY.

```
[AdventureWorks2012].[Sales].[GetBestOrdersByCustomerID]([CustomerID], 3);
```

10	11003	000	000	000	9	000	000	000	000	8	000	000	5	<input checked="" type="checkbox"/>	000	000	000	000	000	9	000	000	1	000	000	2	3399.9900
----	-------	-----	-----	-----	---	-----	-----	-----	-----	---	-----	-----	---	-------------------------------------	-----	-----	-----	-----	-----	---	-----	-----	---	-----	-----	---	-----------

```
[AdventureWorks2012].[Sales].[GetBestOrdersByCustomerID]([CustomerID], 3);
```

		10			6														<null>	<null>	<null>	<null>
		11			7														- 1..1.	- 1..1.	- 1..1.	- 1..1.

Задане 4

Измените созданную inline table-valued функцию, сделав ее multistatement table-valued (предварительно сохранив для проверки код создания inline table-valued функции).

```
CREATE FUNCTION [Sales].GetBestOrdersByCustomerID(@CustomerID INT, @CountOfRow INT)
RETURNS @result TABLE(
    [SalesOrderID] INT NOT NULL,
    [RevisionNumber] TINYINT NOT NULL,
    [OrderDate] DATETIME NOT NULL,
    [DueDate] DATETIME NOT NULL,
    [ShipDate] DATETIME NULL,
    [Status] TINYINT NOT NULL,
    [OnlineOrderFlag] dbo.Flag NOT NULL,
    [SalesOrderNumber] NVARCHAR(23),
    [PurchaseOrderNumber] dbo.OrderNumber NULL,
    [AccountNumber] dbo.AccountNumber NULL,
    [CustomerID] INT NOT NULL,
    [SalesPersonID] INT NULL,
    [TerritoryID] INT NULL,
    [BillToAddressID] INT NOT NULL,
    [ShipToAddressID] INT NOT NULL,
    [ShipMethodID] INT NOT NULL,
    [CreditCardID] INT NULL,
    [CreditCardApprovalCode] VARCHAR(15) NULL,
    [CurrencyRateID] INT NULL,
    [SubTotal] MONEY NOT NULL ,
    [TaxAmt] MONEY NOT NULL,
    [Freight] MONEY NOT NULL,
    [TotalDue] INT NOT NULL,
    [Comment] NVARCHAR(128) NULL,
    [rowguid] UNIQUEIDENTIFIER ROWGUIDCOL NOT NULL,
    [ModifiedDate] DATETIME NOT NULL
) AS BEGIN
    INSERT INTO @result
    SELECT TOP(@CountOfRow)
        [SalesOrderID],
        [RevisionNumber],
        [OrderDate],
        [DueDate],
        [ShipDate],
        [Status],
        [OnlineOrderFlag],
        [SalesOrderNumber],
        [PurchaseOrderNumber],
        [AccountNumber],
```

```
[CustomerID],
[SalesPersonID],
[TerritoryID],
[BillToAddressID],
[ShipToAddressID],
[ShipMethodID],
[CreditCardID],
[CreditCardApprovalCode],
[CurrencyRateID],
[SubTotal],
[TaxAmt],
[Freight],
[TotalDue],
[Comment],
[rowguid],
[ModifiedDate]
FROM [AdventureWorks2012].[Sales].[SalesOrderHeader]
WHERE [CustomerID] = @CustomerID
ORDER BY [TotalDue] DESC
RETURN
END;
```
